

Self Propelled Agricultural Equipment Questionnaire – First Processors

Overview

- Production agricultural associations in cooperation with the State of California are conducting a statewide survey to obtain an accurate inventory of self-propelled off-road equipment (25HP and higher) used in agricultural operations in California.
- **All individual survey results will be kept confidential.** There are approximately 3 questions in this survey and it should take about 20 minutes of your time depending on how much equipment you own. Please complete and return the survey even if you don't own any equipment.
- **This survey is intended for first processing facilities such as packinghouses, cotton gins, nut hullers and processors, dehydrators, and feed and grain mills.** A more detailed definition is provided below.*

Section 1. Your operation

1.1. In what region are your facilities? Please provide percentage of total operation in each region.

Region # _____	Percentage _____	Region # _____	Percentage _____
Region # _____	Percentage _____	Region # _____	Percentage _____
Region # _____	Percentage _____	Region # _____	Percentage _____

Section 2. Commodity Information

2.1. Please list all the commodities processed by your operation in 2008. If you need additional space please use the table on page 7 of this survey.

Commodity	Amount Processed	Units (tons or number of head)	% processed from out of state

* First processing facilities are those that perform agricultural crop preparation services such as packinghouses, cotton gins, nut hullers and processors, dehydrators, and feed and grain mills. First processing includes ONLY the first processing of agricultural goods after harvest, and not subsequent processing, canning, or other similar activities. However, if an agricultural product undergoes first processing and subsequent processing (such as canning) in the same facility, all off-road vehicles operating at that facility are considered first processing vehicles, regardless of whether they were engaged in the first or secondary processing activities. If a facility receives both unprocessed, and processed agricultural materials, they can still be considered a first processing facility if over 50 percent of the material received is unprocessed. Distribution centers are not considered first processing facilities. Some examples of first processing facilities are:

- A winery that receives unprocessed grapes to make wine;
- A grain mill that receives a grain or hay to make animal feed; and
- A facility that receives whole tomatoes to make tomato paste.

Self propelled equipment (25 HP or higher)
Agricultural Tractors
Manlifts
Skid Steers/Front wheel loaders/backhoes/other construction used in Ag
Forklifts
ATV (used exclusively for agricultural operations)
Other Agricultural Equipment not listed above

Thank you. Your assistance is greatly appreciated.

Section 2. Commodity Information - ADDITIONAL SPACE IF NEEDED

2.1. Please list all the commodities processed by your operation in 2008.

Commodity	Amount Processed	Units (tons or number of head)

Your Name: _____

Your Company: _____

Your Phone: _____

Your Email: _____
